Seismic segmentation of the NAF

1. 2014 Gokceada earthquake (Konca et al., 2018)

2. 1912 Ganos M7.4 earthquake segment

3. Marmara Sea segments

4. 1999, M7.6 Izmit/M7.2 Duzce sequence

FAULT CREEP AND PERSISTENT ASPERITIES ON THE WESTERN SECTION OF THE NORTH ANATOLIAN FAULT, TURKEY

Seismicity is directly associated with areas of low aseismic mid-crust? (Bohnhoff et al., 2016, Figure 5)
